1	<b>CENTER_NO</b>	number (2,0)	Required: true																
Center identification number.																			
<table border="1"><thead><tr><th colspan="2">Allowable Values</th></tr></thead><tbody><tr><td>11</td><td>Cancer Care Ontario - Colon</td></tr><tr><td>12</td><td>USC Consortium - Colon</td></tr><tr><td>13</td><td>University of Melbourne - Colon</td></tr><tr><td>14</td><td>Cancer Research Center of Hawaii - Colon</td></tr><tr><td>15</td><td>Mayo Clinic - Colon</td></tr><tr><td>16</td><td>Fred Hutchinson, Seattle - Colon</td></tr><tr><td>17</td><td>Northern California (NCCC) - Colon</td></tr></tbody></table>				Allowable Values		11	Cancer Care Ontario - Colon	12	USC Consortium - Colon	13	University of Melbourne - Colon	14	Cancer Research Center of Hawaii - Colon	15	Mayo Clinic - Colon	16	Fred Hutchinson, Seattle - Colon	17	Northern California (NCCC) - Colon
Allowable Values																			
11	Cancer Care Ontario - Colon																		
12	USC Consortium - Colon																		
13	University of Melbourne - Colon																		
14	Cancer Research Center of Hawaii - Colon																		
15	Mayo Clinic - Colon																		
16	Fred Hutchinson, Seattle - Colon																		
17	Northern California (NCCC) - Colon																		
2	<b>PERSON_ID</b>	string (12)	Required: true																
Number that Uniquely Identifies an Individual.																			
3	<b>MSI_TEST_LAB</b>	number (1,0)	Required: true																
Code for type of lab that did the MSI testing.																			
<table border="1"><thead><tr><th colspan="2">Allowable Values</th></tr></thead><tbody><tr><td>1</td><td>CFR Lab</td></tr><tr><td>2</td><td>Clinical Lab</td></tr></tbody></table>				Allowable Values		1	CFR Lab	2	Clinical Lab										
Allowable Values																			
1	CFR Lab																		
2	Clinical Lab																		
4	<b>MSI_STATUS_PERSON_CLINIC</b>	number (1,0)	Required: false																
MSI status of person tested.																			

Allowable Values

- 1 Stable
- 2 MSI - Low
- 3 MSI - High

**Error Description**

If MSI\_TEST\_LAB = 2, MSI\_STATUS\_PERSON\_CLINIC must be null

5	<b>COLLECTION_CID</b>	string (30)	Required: true
Identifier used internally by centers to denote a unique surgical event.			

6	<b>TEST_TISSUE</b>	number (1,0)	Required: true
Tissue on which test was performed.			

Allowable Values	
1	Cancer
2	Contiguous (Adjacent) adenoma
3	Colon Polyp
4	Gastric polyp
5	Sebaceous adenoma

7	<b>TUMOR_NO</b>	number (2,0)	Required: true
Numbers labeling tumors of the individual. Numbers are not necessarily sequential.			

Allowable Values	
1 to 99	Range
-9	NA/Out of scope: Tissue does not currently have a TUMOR_NO and is not cancer or contiguous adenoma
-15	Information Unknown

8	<b>POLYP_NO</b>	number (2,0)	Required: true
Sequential number over range of 1 to 99 to distinguish a polyp removed on a particular date. The tuple PERSON_ID, DATE_COLLECTED, and POLYP_NO uniquely identify a physical polyp globally within the CFR database.			

Allowable Values	
1 to 99 or -9, -1	Range
-9	NA/Out of scope. Tissue is not a polyp.
-1	Polyp has IHC/MSI result but center is currently unable to locate polyp pathology information. Center review to obtain this information is currently underway.

9	<b>BLOCK_SPEC_CID</b>	string (40)	Required: true
Unique local identifier used at a center to uniquely identify a block tissue specimen.			

10	<b>NUC_ACID_CID_TUMOR</b>	string (40)	Required: true																								
Center's unique identifier for the tumor DNA used in this MSI test. Each DNA extraction has a unique identifier.																											
11	<b>NUC_ACID_CID_NORMAL</b>	string (40)	Required: true																								
Center's unique identifier for the normal DNA used in this MSI test. Each DNA extraction has a unique identifier.																											
12	<b>METASTASIS</b>	number (1,0)	Required: true																								
Primary or metastatic tumor.																											
<table border="1"> <tr><td colspan="2">Allowable Values</td></tr> <tr><td>1</td><td>Primary</td></tr> <tr><td>2</td><td>Metastasis</td></tr> <tr><td>-9</td><td>Test is not performed on cancerous tissue</td></tr> </table>				Allowable Values		1	Primary	2	Metastasis	-9	Test is not performed on cancerous tissue																
Allowable Values																											
1	Primary																										
2	Metastasis																										
-9	Test is not performed on cancerous tissue																										
13	<b>MSI_DETECTION_METHOD</b>	number (2,0)	Required: true																								
MSI Testing method.																											
<table border="1"> <tr><td colspan="2">Allowable Values</td></tr> <tr><td>1</td><td>PCR non-radiolabeled</td></tr> <tr><td>2</td><td>PCR radiolabeled</td></tr> <tr><td>3</td><td>Fluorescent PCR capillary electrophoresis</td></tr> <tr><td>4</td><td>Fluorescent PCR slab gel electrophoresis</td></tr> <tr><td>5</td><td>Silver-stained gel electrophoresis</td></tr> <tr><td>-13</td><td>Not tested: Quantity of DNA or tissue not sufficient</td></tr> <tr><td>-15</td><td>Method not specified</td></tr> </table>				Allowable Values		1	PCR non-radiolabeled	2	PCR radiolabeled	3	Fluorescent PCR capillary electrophoresis	4	Fluorescent PCR slab gel electrophoresis	5	Silver-stained gel electrophoresis	-13	Not tested: Quantity of DNA or tissue not sufficient	-15	Method not specified								
Allowable Values																											
1	PCR non-radiolabeled																										
2	PCR radiolabeled																										
3	Fluorescent PCR capillary electrophoresis																										
4	Fluorescent PCR slab gel electrophoresis																										
5	Silver-stained gel electrophoresis																										
-13	Not tested: Quantity of DNA or tissue not sufficient																										
-15	Method not specified																										
14	<b>MSI_ACTC</b>	number (2,0)	Required: true																								
MSI test result at ACTC locus																											
<table border="1"> <tr><td colspan="2">Allowable Values</td></tr> <tr><td>1</td><td>Stable</td></tr> <tr><td>2</td><td>Unstable</td></tr> <tr><td>6</td><td>Equivocal (Inconclusive)</td></tr> <tr><td>7</td><td>Stable - Normal DNA not used in test</td></tr> <tr><td>8</td><td>Unstable - Normal DNA not used in test</td></tr> <tr><td>9</td><td>Equivocal (Inconclusive) - Normal DNA not used in test</td></tr> <tr><td>-11</td><td>No Amplification</td></tr> <tr><td>-12</td><td>Not tested, reason not specified</td></tr> <tr><td>-13</td><td>Quantity of DNA or tissue not sufficient</td></tr> <tr><td>-14</td><td>Tested, outcome not specified</td></tr> <tr><td>-15</td><td>Unknown if tested</td></tr> </table>				Allowable Values		1	Stable	2	Unstable	6	Equivocal (Inconclusive)	7	Stable - Normal DNA not used in test	8	Unstable - Normal DNA not used in test	9	Equivocal (Inconclusive) - Normal DNA not used in test	-11	No Amplification	-12	Not tested, reason not specified	-13	Quantity of DNA or tissue not sufficient	-14	Tested, outcome not specified	-15	Unknown if tested

<b>1</b>	Stable												
<b>2</b>	Unstable												
<b>6</b>	Equivocal (Inconclusive)												

7	Stable - Normal DNA not used in test
8	Unstable - Normal DNA not used in test
9	Equivocal (Inconclusive) - Normal DNA not used in test
-11	No Amplification
-12	Not tested, reason not specified
-13	Quantity of DNA or tissue not sufficient
-14	Tested, outcome not specified
-15	Unknown if tested

18	<b>MSI_BAT40</b>	number (2,0)	Required: true
MSI test result at BAT40 locus			

Allowable Values	
1	Stable
2	Unstable
6	Equivocal (Inconclusive)
7	Stable - Normal DNA not used in test
8	Unstable - Normal DNA not used in test
9	Equivocal (Inconclusive) - Normal DNA not used in test
-11	No Amplification
-12	Not tested, reason not specified
-13	Quantity of DNA or tissue not sufficient
-14	Tested, outcome not specified
-15	Unknown if tested

19	<b>MSI_D5S346</b>	number (2,0)	Required: true
MSI test result at D5S346 locus			

Allowable Values	
1	Stable
2	Unstable
6	Equivocal (Inconclusive)
7	Stable - Normal DNA not used in test
8	Unstable - Normal DNA not used in test
9	Equivocal (Inconclusive) - Normal DNA not used in test
-11	No Amplification
-12	Not tested, reason not specified
-13	Quantity of DNA or tissue not sufficient
-14	Tested, outcome not specified

-15	Unknown if tested
-----	-------------------

20	<a href="#">MSI_D10S197</a>	number (2,0)	Required: true
MSI test result at D10S197 locus			

Allowable Values	
1	Stable
2	Unstable
6	Equivocal (Inconclusive)
7	Stable - Normal DNA not used in test
8	Unstable - Normal DNA not used in test
9	Equivocal (Inconclusive) - Normal DNA not used in test
-11	No Amplification
-12	Not tested, reason not specified
-13	Quantity of DNA or tissue not sufficient
-14	Tested, outcome not specified
-15	Unknown if tested

21	<a href="#">MSI_D17S250</a>	number (2,0)	Required: true
MSI test result at D17S250 locus			

Allowable Values	
1	Stable
2	Unstable
6	Equivocal (Inconclusive)
7	Stable - Normal DNA not used in test
8	Unstable - Normal DNA not used in test
9	Equivocal (Inconclusive) - Normal DNA not used in test
-11	No Amplification
-12	Not tested, reason not specified
-13	Quantity of DNA or tissue not sufficient
-14	Tested, outcome not specified
-15	Unknown if tested

22	<a href="#">MSI_D18S55</a>	number (2,0)	Required: true
MSI test result at D18S55 locus			

Allowable Values	
1	Stable
2	Unstable

6	Equivocal (Inconclusive)
7	Stable - Normal DNA not used in test
8	Unstable - Normal DNA not used in test
9	Equivocal (Inconclusive) - Normal DNA not used in test

10. [IHC\\_MLH1](#)
11. [IHC\\_MSH2](#)
12. [IHC\\_MSH6](#)
13. [IHC\\_PMS2](#)

1	<b>CENTER_NO</b>	number (2,0)	Required: true
Center identification number.			

Allowable Values	
11	Cancer Care Ontario - Colon
12	USC Consortium - Colon
13	University of Melbourne - Colon
14	Cancer Research Center of Hawaii - Colon
15	Mayo Clinic - Colon
16	Fred Hutchinson, Seattle - Colon
17	Northern California (NCCC) - Colon

2	<b>PERSON_ID</b>	string (12)	Required: true
Number that Uniquely Identifies an Individual.			

3	<b>IHC_TEST_LAB</b>	number (1,0)	Required: true
Lab that conducted the results			

Allowable Values	
1	CFR lab
2	Clinical lab

4	<b>COLLECTION_CID</b>	string (40)	Required: true
The label assigned by the center to all tissue associated with a single surgical event - resection or biopsy/endoscopy procedure.			

5	<b>TEST_TISSUE</b>	number (1,0)	Required: true
Type of tissue tested.			

Allowable Values	
1	Cancer
2	Contiguous (Adjacent) adenoma

3	Colon Polyp
4	Gastric polyp
5	Sebaceous adenoma

6	<b>TUMOR_NO</b>	number (2,0)	Required: true
Numbers labeling tumors of the individual. Numbers are not necessarily sequential.			

Allowable Values

1 to 99 or -9, -15	Range
-9	NA/Out of scope: Tissue does not currently have a TUMOR_NO and is not cancer or contiguous adenoma
-15	Information Unknown

7	<b>POLYP_NO</b>	number (2,0)	Required: true
Sequential number over range of 1 to 99 to distinguish a polyp removed on a particular date. The tuple PERSON_ID, DATE_COLLECTED, and POLYP_NO uniquely identify a physical polyp globally within the CFR database.			

Allowable Values

1 to 99 or -1, -9	Range
-9	NA/Out of scope. Tissue is not a polyp.
-1	Polyp has IHC/MSI result but center is currently unable to locate polyp pathology information. Center review to obtain this information is currently underway.

8	<b>BLOCK_SPEC_CID</b>	string (40)	Required: true
Unique local identifier used at a center to uniquely identify a block tissue specimen.			

9	<b>METASTASIS</b>	number (1,0)	Required: true
Primary or metastatic tumor.			

Allowable Values

1	Primary
2	Metastasis
-9	Test is not performed on cancerous tissue

10	<b>IHC_MLH1</b>	number (2,0)	Required: true
IHC result for MSI test at locus MLH1			

Allowable Values

0	Negative - Expression absent and abnormal
1	Positive - Expression present and normal
2	Positive - Technically poor, probably positive
3	Positive - Technically equivocal, not truly interpretable but if forced would be positive

4	Negative - Technically poor, probably negative
5	Negative - Technically equivocal, not truly interpretable but if forced would be negative
7	Heterogeneous tumor - some areas lack expression and some have expression
8	Reduced - expression reduced but not absent
-11	Technical failure
-12	Not tested
-13	Quantity of tissue not sufficient

11	<b>IHC_MSH2</b>	number (2,0)	Required: true
IHC result for MSI test at locus MSH2			

Allowable Values	
0	Negative - Expression absent and abnormal
1	Positive - Expression present and normal
2	Positive - Technically poor, probably positive
3	Positive - Technically equivocal, not truly interpretable but if forced would be positive
4	Negative - Technically poor, probably negative
5	Negative - Technically equivocal, not truly interpretable but if forced would be negative
7	Heterogeneous tumor - some areas lack expression and some have expression
8	Reduced - expression reduced but not absent
-11	Technical failure
-12	Not tested
-13	Quantity of tissue not sufficient

12	<b>IHC_MSH6</b>	number (2,0)	Required: true
IHC result for MSI test at locus MSH6			

Allowable Values	
0	Negative - Expression absent and abnormal
1	Positive - Expression present and normal
2	Positive - Technically poor, probably positive
3	Positive - Technically equivocal, not truly interpretable but if forced would be positive
4	Negative - Technically poor, probably negative
5	Negative - Technically equivocal, not truly interpretable but if forced would be negative
7	Heterogeneous tumor - some areas lack expression and some have expression
8	Reduced - expression reduced but not absent
-11	Technical failure
-12	Not tested
-13	Quantity of tissue not sufficient

13

IHC\_PMS2

number (2,0)

Required: true

IHC result for MSI test at locus PMS2

Allowable Values	
<b>0</b>	Negative - Expression absent and abnormal
<b>1</b>	Positive - Expression present and normal
<b>2</b>	Positive - Technically poor, probably positive
<b>3</b>	Positive - Technically equivocal, not truly interpretable but if forced would be positive
<b>4</b>	Negative - Technically poor, probably negative
<b>5</b>	Negative - Technically equivocal, not truly interpretable but if forced would be negative
<b>7</b>	Heterogeneous tumor - some areas lack expression and some have expression
<b>8</b>	Reduced - expression reduced but not absent
<b>-11</b>	Technical failure
<b>-12</b>	Not tested
<b>-13</b>	Quantity of tissue not sufficient

13. [GENOMIC\\_REGION\\_TESTED](#)
14. [VARIANT\\_NAME](#)

1	<b>CENTER_NO (*PK)</b>	number (2,0)	Required: true
Center identification number. *CENTER_NO & NUC_ACID_CID are the primary key for the table.			

Allowable Values	
11	Cancer Care Ontario - Colon
12	USC Consortium - Colon
13	University of Melbourne - Colon
14	Cancer Research Center of Hawaii - Colon
15	Mayo Clinic - Colon
16	Fred Hutchinson, Seattle - Colon
17	Northern California (NCCC) - Colon

2	<b>PERSON_ID</b>	string (12)	Required: true
Number that Uniquely Identifies an Individual.			

3	<b>GENE</b>	string (20)	Required: true
Gene on which testing has been performed.			

Allowable Values	
BRCA1	<input type="checkbox"/>
BRCA2	<input type="checkbox"/>
MLH1	<input type="checkbox"/>
MSH2	<input type="checkbox"/>
MSH6	<input type="checkbox"/>
PMS2	<input type="checkbox"/>
EPCAM	<input type="checkbox"/>

4	<b>NUC_ACID_CID (*PK)</b>	string (40)	Required: true
Identifier used internally by centers for a nucleic acid sample from a single extraction. *CENTER_NO & NUC_ACID_CID are the primary key for the table.			

5	<b>MLPA_DATE_TESTED</b>	string (8)	Required: true
---	-------------------------	------------	----------------

Date of test.

Date Value Check		
<p>The date must follow to the following format:</p> <p>Format YYYYMMDD. Must consist of valid date.          Components of date should be right justified and zero filled.          MM = 01 - 12, 88, 99          DD = 01 - 31, 88, 99          YYYY = <b>Minimum year</b> - system date year, 8888, 9999          Use 88, 8888 for not currently known, in progress to obtain information.          Use 99, 9999 for not known.          If century is known, but year is unknown then give an estimate of year or code YYYY = 9999.          If MM = 99 then DD must = 99.          If century is known, but year is unknown then give an estimate of year or code YYYY = 9999.          If YYYY = 9999 then MM and DD must = 99.</p> <p>The following special parameters are used:</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td style="text-align: center;"><b>1700</b></td> <td>Minimum year</td> </tr> </table>	<b>1700</b>	Minimum year
<b>1700</b>	Minimum year	

6	<b>MLPA_INVEST_ID</b>	number (1,0)	Required: true
---	-----------------------	--------------	----------------

Laboratory investigator conducting the tests on samples.

Allowable Values	
1	Dr. Steve Thibodeau
2	Dr. Melissa Southey
3	GMP Genetics (Corporation)
4	Joanne Young
5	Clinical Laboratory
6	Dan Buchanan

7	<b>MLPA_DETECTION_METHOD</b>	number (1,0)	Required: false
---	------------------------------	--------------	-----------------

Testing method.

Allowable Values	
1	Multiplex ligation-dependent probe amplification (MLPA)
2	Conversion analysis

8	<b>MLPA_RESULT</b>	number (1,0)	Required: true
---	--------------------	--------------	----------------

Summary of test findings.

Allowable Values	
0	Failed test
1	Negative (no deletion or duplication)
2	Deletion

3	Duplication
4	Equivocal

9	<b>MLPA_RESULT_SUB</b>	number (2,0)	Required:false
Additional specific findings of test.			

Allowable Values

0	Failed test
1	Confirmed by second MLPA test only
2	Confirmed by Southern blot
3	Confirmatory test not done for positive result
4	Confirmed by other method or other information
5	Deletion artifact. DNA sequence change under primer found by sequencing (scored as negative)
6	Deletion artifact. Results not consistent, normal on repeat (scored as negative)
7	Deletion artifact. Southern did not confirm deletion
8	Deletion artifact. Sequencing and/or Southern not done to determine cause for discordant result (assumed to be negative based on analysis of other similar cases)
9	Deletion artifact, Other
10	Duplication artifact. Results not consistent, normal on MLPA repeat (scored as negative)
11	Duplication artifact. Southern did not confirm duplication
12	Duplication artifact. Sequencing and/or Southern not done to determine cause for discordant result (assumed to be negative based on analysis of other similar cases)
13	Duplication artifact, Other
14	Equivocal. Single exon deletion, unclear whether artifact; Southern could not be performed
15	Equivocal. Multiple exons deleted, not enough sample to repeat test
16	Equivocal. Single exon duplication, unclear whether artifact; Southern could not be performed
17	Equivocal. Multiple exons duplicated, not enough sample to repeat test
-7	NA One assay only for negative result

**Error Description**

If MLPA\_RESULT = 0, then MLPA\_RESULT\_SUB = 0

If MLPA\_RESULT=1 then MLPA\_RESULT\_SUB must be in (-7,1,2) or in range 4-13

If MLPA\_RESULT is 2 or 3, then MLPA\_RESULT\_SUB must be in range 1-4

If MLPA\_RESULT=4, then MLPA\_RESULT\_SUB must be in range 14-17

10	<b>MLPA_EXON_FROM</b>	number (10,0)	Required:false
Starting exon in range.			

Allowable Values

1 to 9999999999 or -7	Range

-7 NA: Negative result or failed test Otherwise number of starting exon.

**Error Description**

If MLPA\_RESULT is in (0,1), then MLPA\_EXON\_FROM must be -7

If MLPA\_RESULT is in (2,3,4), then MLPA\_EXON\_FROM must not be -7

If GENE = MLH1 then MLPA\_EXON\_FROM must be -7 or in range 1-19

If GENE = MSH2 then MLPA\_EXON\_FROM must be -7 or in range 1-16

If GENE = MSH6 then MLPA\_EXON\_FROM must be -7 or in range 1-10

If GENE = PMS2 then MLPA\_EXON\_FROM must be -7 or in range 1-15

11 **MLPA\_EXON\_TO** number (10,0) Required:false  
Ending exon in range.

Allowable Values

1 to 9999999999 or -7 Range

-7 NA: Negative result or failed test Otherwise number of starting exon.

**Error Description**

If MLPA\_RESULT is 0 or 1, then MLPA\_EXON\_TO must be -7

If MLPA\_RESULT is in (2,3,4), then MLPA\_EXON\_TO must not be -7

If GENE = MLH1 then MLPA\_EXON\_TO must be -7 or in range 1-19

If GENE = MSH2 then MLPA\_EXON\_TO must be -7 or in range 1-16

If GENE = MSH6 then MLPA\_EXON\_TO must be -7 or in range 1-10

If GENE = PMS2 then MLPA\_EXON\_TO must be -7 or in range 1-15

12 **MLPA\_OTHER\_TEST\_COMMENT** string (400) Required:false  
Text field containing comments regarding other test findings.

13 **GENOMIC\_REGION\_TESTED** string (100) Required:false  
Indicates what part(s) of the gene or other genomic region(s) was tested.

14 **VARIANT\_NAME** string (100) Required:false  
Proper variant name using HGVS nomenclature.

1	<b>CENTER_NO (*PK)</b>	number (2,0)	Required: true																
Center identification number. * CENTER_NO & GENOMIC_CID are the primary key for the table.																			
<table border="1"><thead><tr><th colspan="2">Allowable Values</th></tr></thead><tbody><tr><td>11</td><td>Cancer Care Ontario - Colon</td></tr><tr><td>12</td><td>USC Consortium - Colon</td></tr><tr><td>13</td><td>University of Melbourne - Colon</td></tr><tr><td>14</td><td>Cancer Research Center of Hawaii - Colon</td></tr><tr><td>15</td><td>Mayo Clinic - Colon</td></tr><tr><td>16</td><td>Fred Hutchinson, Seattle - Colon</td></tr><tr><td>17</td><td>Northern California (NCCC) - Colon</td></tr></tbody></table>				Allowable Values		11	Cancer Care Ontario - Colon	12	USC Consortium - Colon	13	University of Melbourne - Colon	14	Cancer Research Center of Hawaii - Colon	15	Mayo Clinic - Colon	16	Fred Hutchinson, Seattle - Colon	17	Northern California (NCCC) - Colon
Allowable Values																			
11	Cancer Care Ontario - Colon																		
12	USC Consortium - Colon																		
13	University of Melbourne - Colon																		
14	Cancer Research Center of Hawaii - Colon																		
15	Mayo Clinic - Colon																		
16	Fred Hutchinson, Seattle - Colon																		
17	Northern California (NCCC) - Colon																		
2	<b>PERSON_ID</b>	string (12)	Required: true																
Number that Uniquely Identifies an Individual.																			
3	<b>GENOMIC_CID (*PK)</b>	string (40)	Required: true																
Center identifier for the test. *CENTER_NO & GENOMIC_CID are the primary key for the table.																			
4	<b>GENE</b>	number (1,0)	Required: true																
Gene on which testing has been performed.																			

Allowable Values

1	MLH1
2	MSH2
3	MSH6
4	MUTYH
5	PMS2
8	EPCAM
10	APC
11	TP53

**VARIANT\_ORIGIN**

number (1,0)

Required: true

Describes if the variant was tested as an acquired or a germline variant.

Allowable Values

1	Presumed somatic
2	Known somatic
3	Germline

**Error Description**

If GENE is in (6,7) AND SOURCE\_NUC\_ACID is in (7,8), then VARIANT\_ORIGIN = 1

If GENE is in (6,7) AND SOURCE\_NUC\_ACID is not in (7,8), then VARIANT\_ORIGIN = 3

**SOURCE\_NUC\_ACID**

number (1,0)

Required: true

Specifies source of tissue used for testing

Allowable Values

1	blood
2	Mouth wash/saliva
3	lymphoblastoid cells
4	normal fresh frozen tissue
5	other non-tumour tissue
6	polyp
7	tumour (paraffin embedded tumour- PET)
8	tumor- fresh frozen
9	unknown/private lab

**NUC\_ACID\_CID**

string (12)

Required: true

Identifier used internally by centers for a single extraction on which the test was carried out

**Error Description**

If SOURCE\_NUC\_ACID=9, then NUC\_ACID\_CID must be -9

8	<b>DETECTION_METHOD</b>	number (2,0)	Required: true
Germline or somatic DNA testing method. (Mass Spec = Sequenom MassARRAY system, MALDI-TOF)			

Allowable Values	
1	DNA Sequencing
10	DHPLC (Denaturing High Performance Liquid Chromatography)
11	Phase 1 protocol DHPLC+SEQ (MLH1 and MSH2)
12	12 SNP panel genotyping by Mass Spec
13	12 SNP panel genotyping, dHPLC with sequencing (MUTYH)
14	9 SNP panel genotyping by Mass Spec
15	9 SNP panel genotyping with sequencing (MUTYH)
16	PTT
17	SSCP
18	Fluorescent ASP (BRAF)
19	HRM with sequencing (KRAS)
33	Sequencing from Conversion Analysis
99	Unknown/private genetic test results

9	<b>GENOMIC_REGION_TESTED</b>	string (100)	Required: true
Indicates what part(s) of the gene or specific mutation or other genomic region(s) was TESTED			

10	<b>TEST_RESULT</b>	number (1,0)	Required: true
Result of the test carried out and this is at the test level (e.g. entire gene sequencing or MSH2 exon 2 etc.). This is NOT at person level or at variant level.			

Allowable Values	
1	Change detected
2	No change detected
3	Test failed
9	Equivocal

11	<b>VARIANT_NAME_RESULT</b>	string (100)	Required: false
Proper variant name using Human Genomic Variant Society (HGVS) nomenclature.			

**Error Description**

If TEST\_RESULT is not 1 or 9 then VARIANT\_NAME\_RESULT must be null

If TEST\_RESULT is 1 and DETECTION\_METHOD is not 10, then VARIANT\_NAME\_RESULT must not be null

12	<b>EXON_NO</b>	number (2,0)	Required: false
Number of exon containing variant. In the case the variant spans more than one exon, then this field should indicate the first exon			

affected by the variant.

Allowable Values

1 to 99 Range

**Error Description**

If TEST\_RESULT is not 1 or 9 and DETECTION\_METHOD is not 10, then EXON\_NO must be null

If DETECTION\_METHOD = 10 AND CENTER\_NO in (11,16) then EXON\_NO must be null

If DETECTION\_METHOD = 10 AND CENTER\_NO = 11 then must EXON\_NO be null

If INTRON\_NO is null AND OTHER\_REGION is null and TEST\_RESULT = 1 AND LAB\_ID not in(998,999), then EXON\_NO must not be NULL

**INTRON\_NO**

number (2,0)

Required:false

13

Number of intron containing variant. In the case the variant spans more than one intron, then this field should indicate the first intron affected by the variant

Allowable Values

1 to 99 Range

**Error Description**

If TEST\_RESULT is not 1, INTRON\_NO then must be null

If DETECTION\_METHOD = 10 AND CENTER\_NO in (11,16) then INTRON\_NO must be null

If DETECTION\_METHOD = 10 AND CENTER\_NO = 11 then INTRON\_NO must be null

If EXON\_NO is null AND OTHER\_REGION is null and TEST\_RESULT = 1 AND LAB\_ID not in(998,999), then INTRON\_NO must not be NULL

**OTHER\_REGION**

number (1,0)

Required:false

14

Region, other than coding exon and intron, containing the variant.

Allowable Values

1 5 UTR

2 3 UTR

3 Other

**Error Description**

If TEST\_RESULT is not 1 or 9, then OTHER\_REGION must be null

If DETECTION\_METHOD = 10 AND CENTER\_NO in (11,16) then OTHER\_REGION must be null

If DETECTION\_METHOD = 10 AND CENTER\_NO = 11 then must OTHER\_REGION be null

If EXON\_NO is null AND INTRON\_NO is null and TEST\_RESULT = 1 AND LAB\_ID not in(998,999), then OTHER\_REGION must not be NULL

**NUC\_POS\_START**

string (20)

Required:false

15

For exonic mutations, the numeric value of the nucleotide first affected by the mutation relative to the reference sequence. For intronic mutations, the numeric value of the first affected nucleotide relative to the exon number; a (-) indicates the number of nucleotides upstream (5) of the exon, and a (+) indicates the number of nucleotides downstream (3) from the exon. The 5 UTR and 3 UTR are considered to be part of the first and last Exon respectively but have special notation here. Positions in the 5-UTR

have (-) sign. Positions in the 3-UTR have (\*) sign.

#### Error Description

If TEST\_RESULT is not 1 or 9, then NUC\_POS\_START must be null

If DETECTION\_METHOD = 10 AND CENTER\_NO in (11,16) then NUC\_POS\_START must be null

If TEST\_RESULT=1 and LAB\_ID not in(998,999), then NUC\_POS\_START must not be null

If NUC\_POS\_START is not null AND if OTHER\_REGION = 1, then NUC\_POS\_START must begin with (-)

If NUC\_POS\_START is not null AND TYPE\_VARIANT = 3 (substitution) AND EXON\_NO is not null AND OTHER\_REGION is null, then NUC\_POS\_START must not begin with (+,-)

If NUC\_POS\_START is not null AND If TYPE\_VARIANT = 3 (substitution) AND INTRON\_NO is not null AND OTHER\_REGION is null then NUC\_POS\_START must begin with in (+, -)

If NUC\_POS\_START is not null AND If TYPE\_VARIANT = 3 (substitution) AND INTRON\_NO is not null AND OTHER\_REGION is null then NUC\_POS\_START must begin with in (+, -)

If NUC\_POS\_START is not null AND if TYPE\_VARIANT = 3, then NUC\_POS\_START = NUC\_POS\_END

If NUC\_POS\_START is not null AND if TYPE\_VARIANT not in (1,3,9), then NUC\_POS\_START must not equal NUC\_POS\_END

#### NUC\_POS\_END

string (20)

Required:false

16

For exonic mutations, the numeric value of the nucleotide last affected by the mutation relative to the reference sequence. For intronic mutations, the numeric value of the first affected nucleotide relative to the exon number; a (-) indicates the number of nucleotides upstream (5) of the exon, and a (+) indicates the number of nucleotides downstream (3) from the exon. The 5 UTR and 3 UTR are considered to be part of the first and Last Exon respectively but have special notation here. Positions in the 5-UTR have (-) sign. Positions in the 3-UTR have (\*) sign

#### Error Description

If TEST\_RESULT is not 1 or 9, then NUC\_POS\_END must be null

If DETECTION\_METHOD = 10 AND CENTER\_NO in (11,16) then NUC\_POS\_END must be null

If TEST\_RESULT=1 and LAB\_ID not in(998,999), then NUC\_POS\_END must not be null

If NUC\_POS\_END is not null AND if OTHER\_REGION = 1, then must begin with (-)

If NUC\_POS\_END is not null AND If TYPE\_VARIANT = 3 (substitution) AND EXON\_NO is not null AND OTHER\_REGION is null, then NUC\_POS\_END must not begin with (+,-)

If NUC\_POS\_END is not null AND If TYPE\_VARIANT = 3 (substitution) AND INTRON\_NO is not null AND OTHER\_REGION is null then NUC\_POS\_END must begin with in (+, -)

If NUC\_POS\_END is not null AND if TYPE\_VARIANT = 3, then NUC\_POS\_START = NUC\_POS\_END

If NUC\_POS\_END is not null and TYPE\_VARIANT not in (1,3,9), then NUC\_POS\_START must not equal NUC\_POS\_END

#### NUCLEOTIDE\_FROM

string (1)

Required:false

17

Expected nucleotide with respect to the reference sequence.

#### Allowable Values

**A** Adenine

**C** Cytosine

**G** Guanine

**T** Thymidine

#### Error Description

If DETECTION\_METHOD = 10 AND CENTER\_NO in (11,16) then NUCLEOTIDE\_FROM must be null

18 **NUCLEOTIDE\_TO** string (1) Required: false  
Observed (mutated) nucleotide.

Allowable Values

**A** Adenine

**C** Cytosine

**G** Guanine

**T** Thymidine

**Error Description**

If TEST\_RESULT is not 1 or 9, then NUCLEOTIDE\_TO must be null

If DETECTION\_METHOD = 10 AND CENTER\_NO in (11,16) then NUCLEOTIDE\_TO must be null

19 **DELETE\_SEQ** string (50) Required: false  
Deletion nucleotide sequence

**Error Description**

If TEST\_RESULT is not 1, then NUCLEOTIDE\_TO must be null

If DETECTION\_METHOD = 10 AND CENTER\_NO in (11,16) then NUCLEOTIDE\_TO must be null

If TEST\_RESULT=1 and TYPE\_VARIANT in (1,7), then NUCLEOTIDE\_TO must not be null

20 **INSERT\_SEQ** string (50) Required: false  
Insertion nucleotide sequence

**Error Description**

If TEST\_RESULT is not 1, then INSERT\_SEQ must be null

If DETECTION\_METHOD = 10 AND CENTER\_NO in (11,16) then INSERT\_SEQ must be null

If TEST\_RESULT=1 and TYPE\_VARIANT in (2,4,7), then INSERT\_SEQ must not be null

21 **TYPE\_VARIANT** number (1,0) Required: false  
Type of genetic change

Allowable Values

**1** Deletion

**2** Insertion

**3** Substitution

**4** Duplication

**5** Translocation

**6** Inversion

**7**

- 7 Complex Rearrangement
- 9 Uncertain

Error Description
If TEST_RESULT is not 1 or 9, then TYPE_VARIANT must be null
If DETECTION_METHOD = 10 AND CENTER_NO in (11,16) then TYPE_VARIANT must be null
If TEST_RESULT is 1 and LAB_ID is not 998 or 999, then TYPE_VARIANT must not be null
If VARIANT_NAME_RESULT is null, AND LAB_ID is not 998 or 999 then TYPE VARIANT must not be null

22	<b>CODON</b>	number (4,0)	Required:false
Numeric location of first mutated amino acid of reference sequence. A numeric value of 1 to the total number of codons on the reference sequence			

- Allowable Values
- 1 to 9999 Range

Error Description
If TEST_RESULT is not 1, then CODON must be null
If DETECTION_METHOD = 10 AND CENTER_NO in (11,16) then CODON must be null
If TEST_RESULT=1 and EXON_NO=null, then CODON must be null
If TEST_RESULT=1 AND EXON_NO is not null AND TYPE_VARIANT =3 , then CODON must not be null

23	<b>AA_FROM</b>	string (1)	Required:false
Wild type amino acid value of first affected amino acid on reference sequence			

- Allowable Values
- A Ala
  - C Cys
  - D Asp
  - E Glu
  - F Phe
  - G Gly
  - H His
  - I Ile
  - K Lys
  - L Leu
  - M Met
  - N Asn
  - P Pro
  - Q Gln
  - R Arg

<b>S</b>	Ser
<b>T</b>	Thr
<b>V</b>	Val
<b>W</b>	Trp
<b>Y</b>	Tyr
<b>X</b>	Stop

Error Description
If TEST_RESULT is not 1, then AA_FROM must be null
If DETECTION_METHOD = 10 AND CENTER_NO in (11,16) then AA_FROM must be null
If TEST_RESULT=1 and EXON_NO=null, then AA_FROM must be null
If TEST_RESULT=1 AND EXON_NO is not null AND TYPE_VARIANT =3 , then AA_FROM must not be null

24	<b>AA_TO</b>	string (1)	Required:false
Expressed amino acid value of last affected amino acid on reference sequence			

Allowable Values	
<b>A</b>	Ala
<b>C</b>	Cys
<b>D</b>	Asp
<b>E</b>	Glu
<b>F</b>	Phe
<b>G</b>	Gly
<b>H</b>	His
<b>I</b>	Ile
<b>K</b>	Lys
<b>L</b>	Leu
<b>M</b>	Met
<b>N</b>	Asn
<b>P</b>	Pro
<b>Q</b>	Gln
<b>R</b>	Arg
<b>S</b>	Ser
<b>T</b>	Thr
<b>V</b>	Val
<b>W</b>	Trp
<b>Y</b>	Tyr
<b>X</b>	Stop

**Error Description**

If TEST\_RESULT is not 1, then AA\_TO must be null

If DETECTION\_METHOD = 10 AND CENTER\_NO in (11,16) then AA\_TO must be null

If TEST\_RESULT=1 and CODON=null, then AA\_TO must be null

If TEST\_RESULT=1 AND EXON\_NO is not null AND TYPE\_VARIANT =3 , then AA\_TO must be not null

**CONSEQUENCE**

number (2,0)

Required:false

25

Category of mutation- defining outcome of the variant

Allowable Values

1 Missense

2 Premature termination

4 Aberrant splicing

7 Nonstop

8 Other

99 Uncertain

**Error Description**

If TEST\_RESULT is not 1 or 9, then CONSEQUENCE must be null

If DETECTION\_METHOD = 10 AND CENTER\_NO in (11,16) then CONSEQUENCE must be null

If TEST\_RESULT is 1, then CONSEQUENCE must NOT be null

**ZYGOSITY**

number (1,0)

Required:false

26

Indicates the heterozygote/homozygote state of a variation, regardless of whether it is a polymorphism, unclassified variant or well established mutation.

Allowable Values

1 Homozygous wildtype

2 Heterozygous

3 Homozygous change

9 unknown

**Error Description**

If VARIANT\_ORIGIN does not equal 3 (germline), then ZYGOSITY must be null

If DETECTION\_METHOD = 10 AND CENTER\_NO in (11,16) then ZYGOSITY must be null

If VARIANT\_ORIGIN = 3 and TEST\_RESULT = 3 (failed), then ZYGOSITY must be null

If VARIANT\_ORIGIN = 3 and TEST\_RESULT not equals 3, then ZYGOSITY must be not null

If VARIANT\_ORIGIN = 3 and TEST\_RESULT=9, then ZYGOSITY must be 9

**SEVERITY**

number (1,0)

Required:false

27

Type of mutation

Allowable Values

1	Deleterious
2	Polymorphism, assumed neutral
3	Unclassified variant
4	Unclassified variant, possibly pathogenic. DNA missense alteration with corresponding loss of expression by tumor IHC; alternatively, missense alteration that cosegregates with the disease in family.

Error Description
If TEST_RESULT is not 1 or 9, then SEVERITY must be null
If DETECTION_METHOD = 10 AND CENTER_NO in (11,16) then SEVERITY must be null
If VARIANT_ORIGIN in (1,2) AND TEST_RESULT = 1, then SEVERITY must be null

28	<b>INSIGHT_SEVERITY</b>	number (1,0)	Required:false
This will be the 5-point severity code which InSiGHT use.			

Allowable Values	
5	Pathogenic
4	Likely Pathogenic
3	Unclassified
2	Likely Neutral
1	Neutral
9	Unknown

Error Description
If TEST_RESULT is not 1 or 9, then INSIGHT_SEVERITY must be null
If DETECTION_METHOD = 10 AND CENTER_NO in (11,16) then INSIGHT_SEVERITY must be null
If TEST_RESULT=1 and SEVERITY=null, INSIGHT_SEVERITY then must be null
If GENE in (6,7), then INSIGHT_SEVERITY must be null

29	<b>LAB_ID</b>	number (3,0)	Required:true
Lab or individual who performed the testing.			

Allowable Values	
119	Graham Casey
125	Steve Gallinger
128	Peter Laird
129	Joanne Young
141	Steve Thibodeau
228	Robert Haile
300	Dan Buchanan
301	Karen Makar
998	Other (specify, free

	text)
999	Unknown

30	<b>LAB_OTHER_TEXT</b>	string (50)	Required:false
Name of other/private lab			

31	<b>DATE_TEST</b>	string (8)	Required:false
Date on which test was performed. Format: YYYYMMDD			

Date Value Check	
The date must follow to the following format:	
Format YYYYMMDD. Must consist of valid date.	
Components of date should be right justified and zero filled.	
MM = 01 - 12, 88, 99	
DD = 01 - 31, 88, 99	
YYYY = <b>Minimum year</b> - system date year, 8888, 9999	
Use 88, 8888 for not currently known, in progress to obtain information.	
Use 99, 9999 for not known.	
If century is known, but year is unknown then give an estimate of year or code YYYY = 9999.	
If MM = 99 then DD must = 99.	
If century is known, but year is unknown then give an estimate of year or code YYYY = 9999.	
If YYYY = 9999 then MM and DD must = 99.	
The following special parameters are used:	
2002	Minimum year

<b>Error Description</b>
Minimum year 2002

# Module: derived

## Module Contents

### d\_MSI\_IHC\_PK\_MSI

- 1. [CENTER\\_NO](#)
- 2. [PERSON\\_ID](#)
- 3. [COLLECTION\\_CID](#)
- 4. [TEST\\_TISSUE](#)
- 5. [TUMOR\\_NO](#)
- 6. [POLYP\\_NO](#)
- 7. [BLOCK\\_SPEC\\_CID](#)
- 8. [NUC\\_ACID\\_CID\\_TUMOR](#)
- 9. [NUC\\_ACID\\_CID\\_NORMAL](#)
- 10. [MSI\\_STATUS\\_DNA](#)

1	<b>CENTER_NO</b>	number (2,0)	Required: true
Center Identification Number.			

Allowable Values	
11	Cancer Care Ontario - Colon
12	USC Consortium - Colon
13	University of Melbourne - Colon
14	Cancer Research Center of Hawaii - Colon
15	Mayo Clinic - Colon
16	Fred Hutchinson, Seattle - Colon
17	Northern California (NCCC) - Colon

2	<b>PERSON_ID</b>	string (12)	Required: true
Number that uniquely identifies an individual.			

3	<b>COLLECTION_CID</b>	string (30)	Required: true
Identifier used internally by centers to denote a unique surgical event.			
This data element is typically used to allow aggregation of all materials, such as blocks, from a single surgery.			

4	<b>TEST_TISSUE</b>	number (1,0)	Required: true
Tissue on which test was performed.			
Only values of 1,2,3 link to pathology information.			
Although values 2 and 3 may represent the same tissue type, their pathology information is stored in different database tables.			
Adjacent adenomas are recorded on the Colorect_Malig table and so are associated with a cancer; Colon polyps are recorded on the Polyps table. As a result, the pathology information for each will differ somewhat.			
There may be cases where TEST_TISSUE variable has level 2 but the ADJ_ADEN variable of Colorect_Malig table indicates no adjacent adenoma present. In these cases, the TEST_TISSUE value takes precedence and the adjacent adenoma is considered to have been overlooked.			

Allowable Values	
1	Cancer
2	Contiguous (Adjacent) adenoma
3	Colon polyp
4	Gastric polyp

5	<b>TUMOR_NO</b>	number (2,0)	Required: true
	<p>Numbers labeling tumors of the individual.</p> <p>Numbers are not necessarily sequential. No adjustment is made when a tumor is deleted from the system. Tumor numbers are never reused. PERSON_NO plus TUMOR_NO uniquely identifies each tumor in the central database. The same tumor number from different tables (including tables outside of the biospecimen module) must always refer to the same physical tumor.</p>		

Allowable Values	
-9	NA/Out of scope: Tissue is not cancer or contiguous adenoma.
-15	Information Unknown

6	<b>POLYP_NO</b>	number (2,0)	Required: true
	<p>Sequential number over range of 1 to 99 to distinguish a polyp removed on a particular date. The tuple PERSON_ID, DATE_COLLECTED, and POLYP_NO uniquely identify a physical polyp globally within the CFR database.</p> <p>The colon pathology form has three sets of identical fields for recording information on polyps. The POLYPS table includes corresponding data elements, i.e. POLYP_SITEx, POLYP_TYPEx, POLYP_SIZEx, POLYP_GRADEx, where x is an integer between 1 and 3, inclusive. The physical polyp referenced by x and this data element must be identical. Polyps are described according to the following rules:</p> <ol style="list-style-type: none"> <li>1. The largest polyp is reported first, followed by next largest</li> <li>2. If size is not indicated, adenomas are reported before hyperplastic polyps</li> <li>3. Polyps with most severe grade are reported</li> </ol> <p>Not all polyps present in available tissue have an assigned value, as some are not described.</p>		

Allowable Values	
-9	NA/Out of scope. Tissue is not a polyp.
-1	Polyp has IHC/MSI result but center is currently unable to locate polyp pathology information. Center review to obtain this information is currently underway.

7	<b>BLOCK_SPEC_CID</b>	string (40)	Required: true
Unique local identifier used at a center to uniquely identify a block tissue specimen.			

Allowable Values	
-15	Information Unknown

8	<b>NUC_ACID_CID_TUMOR</b>	string (40)	Required: true
	<p>Center's unique identifier for the tumor DNA used in this MSI test. Each DNA extraction has a unique identifier.</p> <p>Unique Identifier, If this field is not negative, there will be a matching record on the NUC_ACID table that indicates whether remaining tumor DNA from the extraction used for this test is available for distribution to requestors. If multiple MSI results are provided for the same block and tumor then separate identifiers must be specified.</p>		

Allowable Values	
- 15	DNA identifying information lost/unknown.
- 14	Center does not keep normal tissue DNA identifying information.
- 13	Quantity of DNA or tissue not sufficient.

**NUC\_ACID\_CID\_NORMAL**

string (40)

Required: true

Center's unique identifier for the normal DNA used in this MSI test. Each DNA extraction has a unique identifier.

9

Normal DNA may have been extracted from paraffin embedded normal tissue, blood, mouthwash/buccal cells or fresh frozen normal tissue. Paraffin embedded normal tissue is not necessarily associated with the paraffin block from which the tumor DNA is taken. If this field is not negative, there will be a matching record on the NUC\_ACID table that indicates whether remaining normal DNA from the extraction used for this test is available for distribution to requestors.

Allowable Values

- 15 DNA identifying information lost/unknown.

- 14 Center does not keep normal tissue DNA identifying information.

- 13 Quantity of DNA or tissue not sufficient.

**MSI\_STATUS\_DNA**

number (1,0)

Required: true

MSI status of DNA extraction.

10

For each set of scores with a minimum of 4 of 10 markers (excluding D2S123) that are either stable or unstable (Options 1 and 2 only NOT 7 or 8), the percent unstable among stable and unstable markers is calculated and compared to cutpoints to determine if the results are stable (0% unstable), low (1-29% unstable) or high (30-100% unstable). If only 3 markers are scored but they are all unstable then the status is scored as high.

Allowable Values

-7 NA/Out of scope - Less than 4 marker scores stable or unstable

1 Stable - 0% unstable

2 Low - More than 0% but less than 30% unstable

3 High - At least 30% unstable

### d\_MSI\_IHC\_PK\_IHC

1. [PERSON\\_ID](#)
2. [COLLECTION\\_CID](#)
3. [TEST\\_TISSUE](#)
4. [TUMOR\\_NO](#)
5. [POLYP\\_NO](#)
6. [BLOCK\\_SPEC\\_CID](#)
7. [IHC\\_STATUS\\_TISSUE](#)
8. [MSI\\_STATUS\\_TISSUE](#)
9. [MSIIHC\\_STATUS\\_TISSUE](#)

1	<b>PERSON_ID</b>	string (12)	Required: true												
	Number that Uniquely Identifies an Individual.														
2	<b>COLLECTION_CID</b>	string (40)	Required: true												
	The label assigned by the center to all tissue associated with a single surgical event - resection or biopsy/endoscopy procedure.  This data element is typically used to allow aggregation of all materials, such as blocks, from a single surgery.														
3	<b>TEST_TISSUE</b>	number (1,0)	Required: true												
	Type of tissue tested.  Only values of 1,2,3 link to pathology information. Although values 2 and 3 may represent the same tissue type, their pathology information is stored in different database tables. Adjacent adenomas are recorded on the Colorect_Malig table and so are associated with a cancer; Colon polyps are recorded on the Polyps table. As a result, the pathology information for each will differ somewhat. There may be cases where TEST_TISSUE variable has level 2 but the ADJ_ADEN variable of Colorect_Malig table indicates no adjacent adenoma present. In these cases, the TEST_TISSUE value takes precedence and the adjacent adenoma is considered to have been overlooked.														
	<table border="1"><thead><tr><th colspan="2">Allowable Values</th></tr></thead><tbody><tr><td>1</td><td>Cancer</td></tr><tr><td>2</td><td>Contiguous (Adjacent) adenoma</td></tr><tr><td>3</td><td>Colon Polyp</td></tr><tr><td>4</td><td>Gastric polyp</td></tr><tr><td>5</td><td>Sebaceous adenoma</td></tr></tbody></table>			Allowable Values		1	Cancer	2	Contiguous (Adjacent) adenoma	3	Colon Polyp	4	Gastric polyp	5	Sebaceous adenoma
Allowable Values															
1	Cancer														
2	Contiguous (Adjacent) adenoma														
3	Colon Polyp														
4	Gastric polyp														
5	Sebaceous adenoma														
4	<b>TUMOR_NO</b>	number (2,0)	Required: true												
	Numbers labeling tumors of the individual. Numbers are not necessarily sequential.  No adjustment is made when a tumor is deleted from the system. Tumor numbers are never reused. PERSON_NO plus TUMOR_NO uniquely identifies each tumor in the central database. The same tumor number from different tables (including tables outside of the biospecimen module) must always refer to the same physical tumor.														
	<table border="1"><thead><tr><th colspan="2">Allowable Values</th></tr></thead><tbody><tr><td>1 to 99 or -9, -15</td><td>Range</td></tr><tr><td>-9</td><td>NA/Out of scope: Tissue does not currently have a TUMOR_NO and is not cancer or contiguous adenoma</td></tr><tr><td>-15</td><td>Information Unknown</td></tr></tbody></table>			Allowable Values		1 to 99 or -9, -15	Range	-9	NA/Out of scope: Tissue does not currently have a TUMOR_NO and is not cancer or contiguous adenoma	-15	Information Unknown				
Allowable Values															
1 to 99 or -9, -15	Range														
-9	NA/Out of scope: Tissue does not currently have a TUMOR_NO and is not cancer or contiguous adenoma														
-15	Information Unknown														
	<b>POLYP_NO</b>	number (2,0)	Required: true												

Sequential number over range of 1 to 99 to distinguish a polyp removed on a particular date. The tuple PERSON\_ID, DATE\_COLLECTED, and POLYP\_NO uniquely identify a physical polyp globally within the CFR database.

- 5 The colon pathology form has three sets of identical fields for recording information on polyps. The POLYPS table includes corresponding data elements, i.e. POLYP\_SITEx, POLYP\_TYPEx, POLYP\_SIZEx, POLYP\_GRADEx, where x is an integer between 1 and 3, inclusive. The physical polyp referenced by x and this data element must be identical. Polyps are described according to the following rules:
1. The largest polyp is reported first, followed by next largest
  2. If size is not indicated, adenomas are reported before hyperplastic polyps
  3. Polyps with most severe grade are reported
- Not all polyps present in available tissue have an assigned value, as some are not described.

Allowable Values

1 to 99 or -9, -1	Range
-9	NA/Out of scope. Tissue is not a polyp.
-1	Polyp has IHC/MSI result but center is currently unable to locate polyp pathology information. Center review to obtain this information is currently underway.

**BLOCK\_SPEC\_CID**

string (40)

Required: true

6 Unique local identifier used at a center to uniquely identify a block tissue specimen.

Allowable Values

-15 Information Unknown

**IHC\_STATUS\_TISSUE**

number(1,0)

Required: true

7 IHC status of tissue from tested block.  
Expression is absent if any of IHC\_MLH1, IHC\_MSH2, IHC\_MSH6, IHC\_PMS2 equal either 0 or 4. Expression is normal if at least one of them equals 1 or 2 and none equal 0 or 4.

Allowable Values

-8	No data transmitted from centers
-7	NA/Out of scope: None of IHC_MLH1, IHC_MSH2, IHC_MSH6, IHC_PMS2 recorded values 0,1,2,4.
1	Normal MMR protein expression
2	Absence of MMR protein expression

**MSI\_STATUS\_TISSUE**

number(1,0)

Required: true

8 MSI status of tissue from tested block.  
The maximum of MSI\_STATUS\_DNA over all DNA extractions from a given tissue-block combination.

Allowable Values

-8	No data transmitted from centers
-7	NA/Out of scope - Less than 4 marker scores stable or unstable
1	Stable - 0% unstable
2	Low - More than 0% but less than 30% unstable
3	High - At least 30% unstable

**MSIIHC\_STATUS\_TISSUE**

number(1,0)

Required: true

MMR status considering all MSI DNA extractions and IHC results on that tissue/block combination.

MSIIHC\_STATUS\_TISSUE has a value for each tissue that has an MSI and/or IHC result within a given block.

MSIIHC\_STATUS\_TISSUE is defective 2 if MSI\_STATUS\_TISSUE is high and IHC\_STATUS\_TISSUE is absent.

9 MSIIHC\_STATUS\_TISSUE is defective 1 if it does not qualify as defective 2 and MSI\_STATUS\_TISSUE is high or IHC\_STATUS\_TISSUE is absent.

MSIIHC\_STATUS\_TISSUE is proficient 2 if MSI\_STATUS\_TISSUE is stable or low and IHC\_STATUS\_TISSUE is normal.

MSIIHC\_STATUS\_TISSUE is proficient 1 if it does not qualify as proficient 2 or as defective, and MSI\_STATUS\_TISSUE is stable or low or IHC\_STATUS\_TISSUE is normal.

MSIIHC\_STATUS\_TISSUE otherwise equals -7, corresponding to both MSI\_STATUS\_TISSUE and IHC\_STATUS\_TISSUE equaling -7 or one them equaling -7 with no record available to merge to on the other table.

Allowable Values

**-8** No data transmitted from centers

**-7** NA/Out of Scope - Both source variables out of scope

**1** Proficient MMR 1

**2** Proficient MMR 2

**3** Defective MMR 1

**4** Defective MMR 2

### d\_MSI\_IHC

1. [PERSON\\_ID](#)
2. [IHC\\_STATUS\\_PERSON](#)
3. [MSI\\_STATUS\\_PERSON](#)
4. [MSIIHC\\_STATUS\\_PERSON](#)

1	<b>PERSON_ID</b>	string (12)	Required:TRUE
Number that Uniquely Identifies an Individual.			

2	<b>IHC_STATUS_PERSON</b>	number (1,0)	Required:TRUE
IHC status of person tested.			
Considers IHC results only for colon cancer tumor types. Excludes all other malignancies, adenomas, metastases and in situ carcinomas. Does not restrict to qualifying tumors. If at least one test is abnormal, then IHC_STATUS_PERSON is abnormal. If there are no abnormal results and at least one normal result, then IHC_STATUS_PERSON is normal. Colon cancer is defined by ICDO3 site codes C180, C181, C182, C183, C184, C185, C186, C187, C188, C189, C199, C209, C218, C260, and a malignant tumor (BEHAV=3). On 1/4/2008 the SITE codes used in deriving this variable were expanded to include C218 and C260.			

Allowable Values	
-8	No data transmitted from centers
-7	NA/Out of scope: Individual has IHC record, but no markers having values 0,1,2, or 4.
1	Normal MMR protein expression
2	Absence of MMR protein expression

3	<b>MSI_STATUS_PERSON</b>	number (1,0)	Required:TRUE
MSI status of person tested.			
Considers MSI results only for colon cancer tumor types. Excludes all other malignancies, adenomas, metastases and in situ carcinomas. Does not restrict to qualifying tumors. If at least one MSI_STATUS_TISSUE result is high, then MSI_STATUS_PERSON is high. If no MSI_STATUS_TISSUE result is high but at least one is low, then MSI_STATUS_PERSON is low. If no MSI_STATUS_TISSUE results are high or low, but at least one is stable, then MSI_STATUS_PERSON is stable. Colon cancer is defined by ICDO3 site codes C180, C181, C182, C183, C184, C185, C186, C187, C188, C189, C199, C209, C218, C260, and a malignant tumor (BEHAV=3). On 1/4/2008 the SITE codes used in deriving this variable were expanded to include C218 and C260.			

Allowable Values	
-8	No data transmitted from centers
-7	NA/Out of scope - An MSI record, but no Stable, Low, or High tissue-level result recorded.
1	Stable - No High or Low tissue-level results, but at least one Stable.
2	Low - No High tissue-level results, but at least one Low.
3	High - At least one High tissue-level result

	<b>MSIIHC_STATUS_PERSON</b>	number (1,0)	Required:TRUE
MMR status for person tested.			
Considers MSI and IHC results only for colon cancer tumor types. Excludes all other malignancies, adenomas, metastases and in situ carcinomas. Does not restrict to qualifying tumors. MSIIHC_STATUS_PERSON has a value for each each tissue that has an MSI and/or IHC result within a given block.			

4 MSIIHC\_STATUS\_PERSON is defective 2 if MSI\_STATUS\_PERSON is High and IHC\_STATUS\_PERSON is Abnormal.  
MSIIHC\_STATUS\_PERSON is defective 1 if it does not qualify as defective 2 and MSI\_STATUS\_PERSON is High or IHC\_STATUS\_PERSON is Abnormal.  
MSIIHC\_STATUS\_PERSON is proficient 2 if MSI\_STATUS\_PERSON is Stable or Low and IHC\_STATUS\_PERSON is Normal.  
MSIIHC\_STATUS\_PERSON is proficient 1 if it does not qualify as proficient 2 or as defective, and MSI\_STATUS\_PERSON is Stable or Low or IHC\_STATUS\_PERSON is Normal.  
MSIIHC\_STATUS\_PERSON otherwise equals -7, corresponding to both MSI\_STATUS\_PERSON and IHC\_STATUS\_PERSON equaling -7 or one them equaling -7 with no record available to merge to on the other table.

Allowable Values	
<b>-8</b>	No data transmitted from centers
<b>-7</b>	NA/Out of Scope - Both source variables out of scope
<b>1</b>	Proficient MMR 1
<b>2</b>	Proficient MMR 2
<b>3</b>	Defective MMR 1
<b>4</b>	Defective MMR 2

3. [C\\_MSH2](#)
4. [C\\_MSH6](#)
5. [C\\_PMS2](#)
6. [C\\_MUTYH](#)

1	<b>PERSON_ID</b>	string (12)	Required: FALSE
	Identifier for person that is globally unique within the C-CFR central database. FK. Consists of concatenation of CENTER_NO (2 digit; digits 1-2) + (10 digit local unique individual id; digits 3-12). The 10 digit individual number component should be right justified, zero filled. Ex: Local unique individual id 98765 from New York Breast Center should be: 020000098765 or 20000098765. Ex: Individual Id 98765 from Australia Colon Center should be: 130000098765.		
2	<b>C_MLH1</b>	number (1,0)	Required: FALSE
	Presence of deleterious mutation or unclassified variant in MLH1 gene		
	Allowable Values		
	-8	No data transmitted from centers	
	-9	Failed or equivocal MLPA result or failed sequencing result	
	-1	One of the tests (Genomic or MLPA) has been run, and no deleterious variant or unclassified variant detected	
	1	Both of the tests (Genomics and MLPA) have been run and no deleterious variant or unclassified variant detected	
	2	One or more deleterious variants detected (Genomic or MLPA) (If 1 should be homozygous)	
	-3	One or more unclassified variants detected (Genomic)	
	3	One or more unclassified variants detected (Genomic or MLPA)	
	4	One or more deleterious AND one or more unclassified variants detected (Genomic or MLPA)	
3	<b>C_MSH2</b>	number (1,0)	Required: FALSE
	Presence of deleterious mutation or unclassified variant in MSH2 gene		
	Allowable Values		
	-8	No data transmitted from centers	
	-9	Failed or equivocal MLPA result or failed sequencing result	
	-1	One of the tests (Genomic or MLPA) has been run, and no deleterious variant or unclassified variant detected	
	1	Both of the tests (Genomics and MLPA) have been run and no deleterious variant or unclassified variant detected	
	2	One or more deleterious variants detected (Genomic or MLPA) (If 1 should be homozygous)	
	-3	One or more unclassified variants detected (Genomic)	
	3	One or more unclassified variants detected (Genomic or MLPA)	
	4	One or more deleterious AND one or more unclassified variants detected (Genomic or MLPA)	
4	<b>C_MSH6</b>	number (1,0)	Required: FALSE

Presence of deleterious mutation or unclassified variant in MSH6 gene

Allowable Values

- 8** No data transmitted from centers
- 9** Failed or equivocal MLPA result or failed sequencing result
- 1** One of the tests (Genomic or MLPA) has been run, and no deleterious variant or unclassified variant detected
- 1** Both of the tests (Genomics and MLPA) have been run and no deleterious variant or unclassified variant detected
- 2** One or more deleterious variants detected (Genomic or MLPA) (If 1 should be homozygous)
- 3** One or more unclassified variants detected (Genomic)
- 3** One or more unclassified variants detected (Genomic or MLPA)
- 4** One or more deleterious AND one or more unclassified variants detected (Genomic or MLPA)

**C\_PMS2**

number (1,0)

Required: FALSE

5

Presence of deleterious mutation or unclassified variant in PMS2 gene

Allowable Values

- 8** No data transmitted from centers
- 9** Failed or equivocal MLPA result or failed sequencing result
- 1** One of the tests (Genomic or MLPA) has been run, and no deleterious variant or unclassified variant detected
- 1** Both of the tests (Genomics and MLPA) have been run and no deleterious variant or unclassified variant detected
- 2** One or more deleterious variants detected (Genomic or MLPA) (If 1 should be homozygous)
- 3** One or more unclassified variants detected (Genomic)
- 3** One or more unclassified variants detected (Genomic or MLPA)
- 4** One or more deleterious AND one or more unclassified variants detected (Genomic or MLPA)

**C\_MUTYH**

number (1,0)

Required: FALSE

6

Presence of deleterious mutation or unclassified variant in MUTYH gene

Allowable Values

- 8** No data transmitted from centers
- 9** Failed or equivocal MLPA result or failed sequencing result
- 1** One of the tests (Genomic or MLPA) has been run, and no deleterious variant or unclassified variant detected
- 1** Both of the tests (Genomics and MLPA) have been run and no deleterious variant or unclassified variant detected
- 2** One or more deleterious variants detected (Genomic or MLPA) (If 1 should be homozygous)
- 3** One or more unclassified variants detected (Genomic)
- 3** One or more unclassified variants detected (Genomic or MLPA)
- 4** One or more deleterious AND one or more unclassified variants detected (Genomic or MLPA)
